

Statcounter 說明

由於當時錄製 Statcounter 章節是 2015 年，這之間 Statcounter 介面有更新，因此老師額外補充講義目前的 Statcounter 該如何使用，這邊範例將會以台灣為做範例哩。

1. 進入 Statcounter 之後切換觀看地區需點上方「Edit Chart Data」。

2. 接下來可針對自己所需要查看的裝置(Browser)與地區(Region)還有時間區間(Period)做設置，最後按下 View Chart 就可以囉。

The screenshot shows the Statcounter configuration interface with three main sections highlighted by red boxes:

- Statistic:** Includes a radio button for "Browser" and four checked checkboxes for "Desktop", "Mobile", "Tablet", and "Console". Below these are several other filter options like "Browser Version", "Screen Resolution", etc., all of which are currently unchecked.
- Region:** A dropdown menu showing "Taiwan, Province of China".
- Period:** Includes radio buttons for "Daily", "Weekly", "Monthly", "Quarterly", and "Yearly". Below these are two date pickers: "From" (set to "June 2019") and "To" (set to "June 2020"). At the bottom of this section are "Shortcuts" buttons: "All Data (default)", "Last 12 Months", "Last 6 Months", "Last 3 Months", and "Last Month".

At the bottom right of the interface are two buttons: "Cancel" and "View Chart".

3. 這樣就可以看到台灣的瀏覽器趨勢囉
